MANAGEMENT TIPS FROM HBR 07: WORK ON YOUR BACKHAND

When you're particularly good at something, it's easy to rely on that strength. For example, if your forehand is your stronger stroke, you'll position yourself to use it much more often. But turning weaknesses into strengths will give you a competitive edge and make you a more effective leader.

Focus energy on improving your weak points. Think about your last performance review or ask your peers what one capability you really need to succeed in the current environment. There's no better way to impress that to reveal a killer back-hand when everyone's expecting your forehand.
